"There is no teaching in all the wide world of hygiene so valuable as the  
inculcation of the idea that typhoid fever is a water-borne disease. Excluding  
a not common liability to the air-diffusion of its germs, we require this  
almost undeniably from water directly, or from milk which has been fouled  
by polluted water. Pure water means practically the abatement of both typhoid  
fever and cholera. Our safe standard is to drink only Natural Water only."
